owners, and the environment in
which we work

Process cooling with
ground water

Employee satisfaction, long-term job
security, good working conditions, and
health protection for our employees

350 kW Photovoltaic system for
in-house energy generation

NOWOFOL is a world-market leader with Bavarian roots and sustainability is at the core of everything we do. By that, we mean responsible behavior in harmony with the environment and society. Our goal is to achieve a balance between the convergence of economic goals and environmental and social demands in all business processes. That's the only way to remain profitable in the long run and, at the same time, contribute to the preservation of our environment for future generations.

”

By directing our actions, in a steady and sustainable manner, towards further development, we wish to secure NOWOFOL's future as an independent company and reliable employer. Our goal is to create sustainable values – values for our customers, our employees, our owners, and the company.

Sustainability at NOWOFOL

Protection of the environment has always been of great importance to NOWOFOL. From raw material supplies to production and film deliveries to our customers, we always pay attention to ecological aspects such as energy, material efficiency and exhaust emissions. We have committed ourselves to continually optimizing the company's energy efficiency (certification in accordance with ISO 50001) and to continually measuring and optimizing environmental impact (certification in accordance with ISO 14001).

In addition, we continuously work on development of innovative and environmentally-friendly film solutions. Our films from polypropylene and polyethylene are recyclable and we also offer biodegradable films (in accordance with DIN EN 13432) for the packaging industry and industrial use, as well as a film made of up to 100 % recycled material. Our NOWOFLON ETFE film is a long lasting building material – it has been successfully used for roofs and facades for over 40 years (LEED-certified).

NOWOFOL also takes its social responsibility very seriously. Employee satisfaction, long-term job security, good working conditions, occupational safety and health and employee medical care, as well as continuous education and training, play a significant role in our company. Our regional roots and local partnerships are also very important to us. We are proud to support various social and environmental projects in our region.
